CONTENTS

I. A NOVEL RESONANT CIRCULAR ARRAY: IMPROVED ANALYSIS

G. Fikioris, R. W. P. King, and T. T. Wu

1. Introduction	1
2. The Two-Term Theory and the Modified Kernel	6
3. Phase-Sequence Resonances	9
4. Behavior near a Phase-Sequence Resonance	14
5. Radiation Field at or near a Resonance	15
6. Refinements for Numerical Calculations	20
7. Conclusion	23
Appendix A: The Various Kernels	23
Appendix B: The Parameters in (1) and (3)	27
Acknowledgments	29
References	29

II. THE PERMITTIVITY AND LOSS OF FIBER-LOADED MATERIALS

L. Lewin

1. Background to the Present Study	32
2. Aligned Fibers in a Rectangular Array	36
3. A Variational Expression for ϵ	40
4. A Variational Solution for ϵ	44
5. Spatial Averaging	50
6. Results and Discussion	54
7. Conclusions	60
Appendix A: Effective Wire Radius	61
Appendix B: An Improved Sum Formula	62
Appendix C: The Lattice Sum	65
Appendix D: Evaluation of a Double Integral	72
Appendix E: Hertzian Vector and Fiber Loss	75
Appendix F: A Variational Form for the Permittivity	76
Appendix G: Current-Lattice Integrals	78

Appendix H: Displaced-Lattice Expressions	81
Appendix I: Isolated Fiber Current	84
Summary	85
References	87

III. THE STUDY OF EFFECTIVE MEDIUM PARAMETERS FOR GRANULAR MEDIA

B. Jia, W. Lin, and S. Liu

1. Introduction	89
2. The General Theory of Effective Constitutive Tensor	90
3. The Effective Constitutive Tensor of the Granular Media	94
4. The Application of Effective Medium Theory in the Absorbed Materials of Coating Type	101
5. Conclusion	107
Acknowledgments	107
References	107

IV. PERFORMANCE OF GROUND-BASED HIGH-FREQUENCY RECEIVING ARRAYS WITH ELECTRICALLY SMALL GROUND PLANES

M. M. Weiner

1. Introduction	109
2. Element Directivity	111
3. System Operating Noise Factor	125
4. Array Factor Degradation by Nonhomogeneous Earth	148
5. Summary and Conclusions	152
Acknowledgments	154
References	154

V. AN AUTOMATED OPEN RESONATOR TECHNIQUE FOR MEASUREMENT OF EXTINCTION CROSS- SECTION OF SINGLE FALLING WATER DROPS OVER X BAND

S. Aditya and T. Naveen

1. Introduction	161
2. Open resonator technique for Measurement of	

Extinction Cross-section	162
3. System Used for a Measurement	163
4. Measurement Algorithm	165
5. Results	166
6. Conclusions	170
Acknowledgment	170
References	170

VI. THE DOUBLE DEFORMATION TECHNIQUE

M. J. Tsuk , S. Y. Poh, and J. A. Kong

1. Introduction to Double Deformation	174
2. Modified Double Deformation for Vertical Magnetic Dipole over Lossless Halfspace	187
3. Modified Double Deformation for Vertical Electric Dipole over Lossless Halfspace	202
4. Modified Double Deformation for Vertical Magnetic Dipole over Coated Perfect Conductor	218
5. Modified Double Deformation for Vertical Electric Dipole over Coated Perfect Conductor	234
6. Modified Double Deformation for Vertical Magnetic Dipole over Two-Layer Medium	245
7. Modified Double Deformation for Vertical Electric Dipole over Two-Layer Medium	265
Appendix A. Causality for VMD over Coated Perfect Conductor	276
Appendix B. Double Steepest Descent Path Contributions for VMD over Two-Layer Medium	279
Appendix C. Modified Double Deformation for VMD over Lossy Halfspace	287
References	291

VII. FINITE ELEMENT SOLUTION OF THE ATMOSPHERE'S ELECTROMAGNETIC RESPONSE TO CHARGE PERTURBATIONS ASSOCIATED WITH LIGHTNING

M. E. Baginski

1. Introduction	300
-----------------	-----

2. The Model	304
3. Electric Field Simulations	316
4. Comparison of Simulations and Measurements	334
5. Conclusions	337
Appendix A: Computer Code	339
References	346

VIII. FAST AND ACCURATE INTERPOLATION OF RADIATED FIELDS OVER A CYLINDER

C. Gennarelli, G. Riccio, C. Savarese, and V. Speranza

1. Introduction	349
2. Summary of Optimal One-Dimensional Sampling Series	350
3. Optimal Interpolation over a Cylinder	354
4. Numerical Tests	358
5. Algorithm Stability	363
6. Conclusions	365
Appendix: The Truncation Error Bounds	368
References	374

IX. DIFFRACTION BY A PARALLEL-PLATE WAVEGUIDE CAVITY WITH DIELECTRIC/FERRITE LOADING: PART I—THE CASE OF E POLARIZATION

K. Kobayashi, S. Koshikawa, and A. Sawai

1. Introduction	377
2. Transformed Wave Equations	380
3. Field Representation in the Transform Domain	384
4. Simultaneous Wiener-Hopf Equations	387
5. Decomposition of the Wiener-Hopf Equations	389
6. Some Properties of the Fourier Coefficients	395
7. Formal Solution	397
8. Approximate Solution	400
9. Scattered Field	404
10. Numerical Results and Discussion	406
11. Conclusions	421
Appendix	421

Acknowledgments	423
References	423

**X. DIFFRACTION BY A PARALLEL-PLATE
WAVEGUIDE CAVITY WITH
DIELECTRIC/FERRITE LOADING:
PART II—THE CASE OF H POLARIZATION**

S. Koshikawa and K. Kobayashi

1. Introduction	427
2. Transformed Wave Equations	428
3. Simultaneous Wiener-Hopf Equations	432
4. Exact and Approximate Solutions	436
5. Scattered Field	441
6. Numerical Results and Discussion	443
7. Conclusions	457
Acknowledgments	457
References	457
