ELECTROMAGNETIC WAVES MONOGRAPH SERIES ON PROGRESS IN ELECTROMAGNETICS RESEARCH (PIER)

The Electromagnetic Waves Monograph Series on Progress In Electromagnetics Research (PIER) publishes review articles and comprehensive papers related to all aspects of electromagnetics and applications. Manuscripts must be in English. The first page of an article should contain the title of the paper, the name(s) and address(es) of the author(s) and the name and the address of the corresponding author.

Headings and subheadings for different sections of the paper (e.g., Introduction, Formulation, Methods, Results, Discussion, Conclusion) should be clearly indicated. Detailed mathematical discussions should be placed in an appendix. Units of measurement, abbreviations and symbols should follow the International System of Units (SI). Equations should be numbered consecutively with arabic numerals in parentheses on the right-hand side of the page.

Tables should be given short informative titles and should be numbered consecutively in arabic numerals. Figures in a form suitable for reproduction should be submitted separately from the text as original reproducible drawings, or as high-contrast sharp unmounted photographs on glossy paper. Lettering on figures should be proportional to the size of the figure to ensure legibility after reduction. Indicate with a soft pencil on the back of each figure the top of the figure by an arrow, and the author and the figure number. All figures and tables should be cited consecutively in the text and a list of captions should be provided at the end of the paper.

The reference section should be used only for references to previous work. Additional information, such as experimental details, etc., should be incorporated into the text. References should be numbered in sequence and cited in the text. Technical reports, memos, unpublished or to be published articles should not be listed; only published work in journals or books should be cited as references. References should contain full title and be listed at the end of the paper in the reference section in the numerical order they appear in the text.

Submit five copies of the manuscript to Chief Editor, J. A. Kong, Room 26-305, 77 Massachusetts Avenue, Cambridge, MA 02139, USA. All contributions will be evaluated by independent referees. Papers should be original and must not have been submitted simultaneously to any other place for publication. Authors are solely responsible for the factual accuracy of their papers. It is the responsibility of the corresponding author to secure requisite permission from his or her employer and all papers submitted are understood to have received clearance(s) for publication.
