# CONTENTS

Chapter 1	ANALYSIS OF A WIRE IN THE PRESENCE OF AN OPEN BODY OF REVOLUTION <i>Z. Qiu and C. M. Butler</i>	
1.	Introduction	1
2.	Formulation	5
3.	Results	8
	Acknowledgments	32
	References	33
Chapter 2	SINGLE SCATTERING AND DIFFUSION APPROXIMATION FOR MODIFIED RADIATIVE TRANSFER THEORY OF WAVE MULTIPLE SCATTERING IN DENSE MEDIA NEAR RESONANCE <i>Yu. N. Barabanenkov, L. M. Zurk, and M. Yu. Barabanenkov</i>	
1.	Introduction	37
2.	Modified Radiative Transfer Equation in an Integral Form	39
3.	Solution for MRTE by Iterative Method	42
4.	Diffusion Asymptotics of Solution for MRTE	57
5.	Low-Density Limit and Comparison with Experiments	57
6.	Conclusion and Discussion	57
	Acknowledgements	247
	Appendix I	243
	Appendix II	243
	Appendix III	243
	References	247
Chapter 3	ANALYTICAL EXPLORATION OF NEW TAPERED-GEOMETRY DIELECTRIC-SUPPORTED HELIX SLOW-WAVE STRUCTURES FOR BROADBAND TWT'S <i>S. Ghosh, P. K. Jain, and B. N. Basu</i>	
1.	Introduction	57
2.	Analysis	58

	3. Results and Discussion	59
	Appendices	72
	References	72
Chapter 4	FRIEDLANDER-KELLER SOLUTION FOR THE 3D MAXWELL CASE <i>I. Andronov and D. Bouche</i>	
	1. Introduction	75
	2. Geometry	76
	3. The Equations of Maxwell	87
	4. Friedlander-Keller Solution	90
	5. Creeping Waves	96
	6. Matching Procedure	102
	7. Final Formulae	102
	8. Conclusion	102
	References	103
Chapter 5	Analytical models for ditermination of complex permittivity <i>J. A. K. Adopley, D. G. Dudley, and R. Taheran</i>	
	1. Introduction	107
	2. Forward Problem	111
	3. Inverse Problem	115
	4. Conclusion	125
	Acknowledgments	131
	References	132
Chapter 6	THREE-DIMENSIONAL SUBTERANEAN TARGET IDENTIFICATION BY USE OF OPTIMIZATION TECHNIQUES <i>J. Björkberg and G. Kristensson</i>	
	1. Introduction	133
	2. Optimization Techniques	135
	3. Results	135
	4. Conclusions	142
	Appendix	156
	References	156

Chapter 7	<p style="text-align: center;">A HYBRID INTEGRAL AND DIFFERENTIAL EQUATION METHOD SOLUTION OF SCATTERING OF TM EXCITATION BY INHOMOGENEOUS CYLINDERS BURIED BELOW A MEDIA INTERFACE <i>X. B. Xu and J. Ao</i></p>	
	<ol style="list-style-type: none"> <li>1. Introduction <span style="float: right;">159</span></li> <li>2. Formulation of Integral and Differential Equations <span style="float: right;">160</span></li> <li>3. Hybrid FEM/MOM Numerical Solution <span style="float: right;">162</span></li> <li>4. Far-Zone Scattered Field and Field Inside the Cylinder <span style="float: right;">169</span></li> <li>5. Results and Discussion <span style="float: right;">175</span></li> <li>References <span style="float: right;">175</span></li> </ol>	
Chapter 8	<p style="text-align: center;">CHARACTERISTICS OF CYLINDRICAL MULTICONDUCTOR TRANSMISSION LINES ABOVE A PERFECTLY CONDUCTING GROUND PLANE <i>O. D. Khan, A. Z. Elsherbeni, C. E. Smith, and D. Kaifez</i></p>	
	<ol style="list-style-type: none"> <li>1. Introduction <span style="float: right;">177</span></li> <li>2. Formulation <span style="float: right;">178</span></li> <li>3. Multiconductor Transmission Line Parameters <span style="float: right;">180</span></li> <li>4. Numerical Results <span style="float: right;">183</span></li> <li>5. Summary and Conclusion <span style="float: right;">186</span></li> <li>Acknowledgement <span style="float: right;">202</span></li> <li>References <span style="float: right;">202</span></li> </ol>	
Chapter 9	<p style="text-align: center;">THE GREEN'S FUNCTION PERTURBATION METHOD FOR SOLUTION OF ELECTROMAGNETIC SCATTERING PROBLEMS <i>D. T. Moroney and P. J. Cullen</i></p>	
	<ol style="list-style-type: none"> <li>1. Introduction <span style="float: right;">205</span></li> </ol>	

	2. Integral Transformation	206
	3. Condition for Convergence	209
	4. Choosing $g(x)$	210
	5. Reciprocity	211
	6. Analytic Comparison of the <i>GFPM</i> and the Kirchhoff and Height Perturbation Method	215
	7. Numerical Examples	216
	8. Conclusion	216
	Acknowledgement	217
	Appendix	217
	References	217
Chapter 10	ANALYSIS AND MEASUREMENTS OF ARBITRARILY SHAPED OPEN MICROSTRIP STRUCTURES <i>Z. A. Maricevic and T. K. Sarkar</i>	
	1. Introduction	219
	2. Formulation of the Problem	223
	3. Matrix Pencil	229
	4. Menzel's Leaky-Wave Antenna	235
	5. Experimental Verification	239
	6. Conclusion	242
Chapter 11	SCATTERING AND THERMAL EMISSION FROM A TWO DIMENSIONAL PERIODIC SURFACE <i>J. T. Johnson, R. T. Shin, and J. A. Kong</i>	
	1. Introduction	251
	2. Formulation and Numerical Method	253
	3. Evaluation of Required Integrals	256
	4. Model Validation	259
	5. Pyramidal Surface Thermal Emission	262
	Acknowledgments	273
	References	273
