CONTENTS

Chapter 1. TIME-DOMAIN EFIE, MFIE, AND CFIE FORMULATIONS USING LAGUERRE POLYNOMIALS AS TEMPORAL BASIS FUNCTIONS FOR THE ANALYSIS OF TRANSIENT SCATTERING FROM ARBITRARY SHAPED CONDUCTING STRUCTURES

B. H. Jung, Y.-S. Chung, and T. K. Sarkar

1	Introduction	2
2	Formulation	4
2.1	TD-EFIE	4
2.2	TD-MFIE	9
2.3	TD-CFIE	13
2.4	Current and Far Field	14
3	An Alternative Formulation	15
3.1	TD-EFIE	15
3.2	TD-MFIE	17
3.3	TD-CFIE	18
3.4	Current and Far Field	19
4	Numerical Examples	19
4.1	Spectrum in the Non-Resonance Region	21
4.2	Responses Due to Wide-Band Incident Waveform	29
5	Conclusion	41
Appendix A.		41
References		43

Chapter 2. FDTD MODELING OF A VIBRATING INTRINSIC REVERBERATION CHAMBER

N. K. Koweliotis, P. T. Trakadas, and C. N. Capsalis

1	Introduction	48
2	VIRC Modeling Method	49
3	Field Uniformity	52
4	Field Distribution	54
5	Conclusions	57
References		57

Chapter 3. GREEN'S FUNCTION EXPANSIONS IN DYADIC ROOT FUNCTIONS FOR SHIELDED LAYERED WAVEGUIDES

G. W. Hanson, A. I. Nosich, and E. M. Kartchevski

1	Introduction	62
2	Formulation	64
	2.1 Nontrivial Modal Degeneracies	64
	2.2 Dyadic Green's Functions and Dyadic Residues	68
	2.3 Dyadic Eigenfunctions	75
	2.4 Dyadic Root Functions	80
3	Numerical Results	86
4	Conclusions	89
	Acknowledgment	90
	References	90

Chapter 4. AN EFFECTIVE POWER SYNTHESIS TECHNIQUE FOR SHAPED, DOUBLE-REFLECTOR MULTIFEED ANTENNAS

O. M. Bucci, A. Capozzoli, and G. D'Elia

1	Introduction	94
2	Statement of the Problem and Solution Strategy	97
3	The Two Phases of the Synthesis Problem	101
	3.1 Main Reflector and Subreflector Aperture Field Factor- ization	101
	3.2 Splitting the Synthesis Problem	103
4	The Synthesis Algorithm	106
5	Numerical Analysis	108
6	Conclusions	115
	Appendix A.	116
	Appendix B.	117
	Appendix C.	117
	References	122

Chapter 5. COMPRESSION OF POLARIMETRIC SYNTHETIC APERTURE RADAR DATA

S. El Assad, X. Morin, D. Barba, and V. Slavova

1	Introduction	126
----------	---------------------------	------------

2	Description of the Measurement Device STRADI_VL and of the Chosen Scenes	127
3	Radar Signal Statistics	129
3.1	Means and Variances	130
3.2	Histograms	132
3.3	Auto-correlation and Inter-correlation	135
4	Developed and Evaluated Methods of Compression ..	140
4.1	LBG Algorithm	141
4.2	The Kohonen's Self Organizing Feature Maps	143
5	Conclusion	143
	Acknowledgment	144
	References	144

Chapter 6. SIMPLE TIME-DOMAIN EXPRESSIONS FOR PREDICTION OF CROSSTALK ON COUPLED MICROSTRIP LINES

C. C. Chai, B. K. Chung, and H. T. Chuah

1	Introduction	148
2	The Proposed Simple Time-Domain Crosstalk Expressions	149
2.1	Determination of the Polynomial Coefficients	151
2.2	Deviation Analysis	152
3	Saturation of the Far-end Crosstalk	153
4	The Effect of Losses and Dispersion on Crosstalk Noise 158	
4.1	The Valid Frequency Range for Lossless and Dispersionless Assumption	159
4.2	Incorporation of Losses and Dispersion Effect in Far-end Crosstalk Prediction	160
5	Procedure for Prediction of Crosstalk	164
6	Comparisons with Results from Field Solver and other Models	164
7	Comparisons with Measurement Results	165
8	Conclusion	174
	References	174

**Chapter 7. A GENETIC ALGORITHM/METHOD OF
MOMENTS APPROACH TO THE OPTIMIZATION
OF AN RF COIL FOR MRI APPLICATIONS —
THEORETICAL CONSIDERATIONS**

D. Yau and S. Crozier

1 Introduction	178
2 Theory and Results	179
3 Conclusion	191
Acknowledgment	192
References	192

**Chapter 8. OSCILLATIONS IN SLOTTED RESONATORS
WITH SEVERAL SLOTS: APPLICATION OF
APPROXIMATE SEMI-INVERSION**

Yu. Shestopalov, Y. Okuno, and N. Kotik

1 Introduction	194
2 Semi-Inversion of Integral Operators	196
2.1 Semi-Inversion of Meromorphic Integral OVF: One Interval of Integration	196
2.2 Two Intervals of Integration: Approximate Semi-Inver- sion of the Principal Part	199
2.3 Estimates for the Inner Product	202
2.4 Approximate Determination of Characteristic Numbers .	204
3 Rectangular Slotted Cavities	211
3.1 Rectangular Cavity with One Slot	211
3.2 Rectangular Cavity with Two Slots in One Wall	214
3.3 Rectangular Cavity with Two Slots in Opposite Walls ..	215
3.4 Critical Points and Mode Coupling	220
4 Numerical and Discussion	224
4.1 Regular Regimes	224
4.2 Critical Regimes: Interaction of Oscillations	228
5 Conclusion	239
Acknowledgment	240
Appendix A.	240
Appendix B.	245
References	246

Chapter 9. HOMOGENIZATION OF AN ARRAY OF S-SHAPED PARTICLES LOCATED ON A DIELECTRIC INTERFACE

C. R. Simovski, B. Sauviac, and S. L. Prosvirnin

1	Introduction	250
2	Description of the Array	253
3	Homogenization of the Structure	254
4	Effective Permittivity of an Homogenized Layer and Comparison with Numerical Simulation	259
5	Conclusion	262
	References	263

Chapter 10. MODES IN A HARD SURFACE WAVEGUIDE WITH UNIAXIALLY ANISOTROPIC CHIRAL MATERIAL FILLING

S. F. Mahmoud and A. J. Viitanen

1	Introduction	266
2	Theory	266
3	Eigenfields	269
4	Reflection and Transmission at Isotropic and Anisotropic Chiral Interface	272
5	Scattering from a Uniaxial Chiral Waveguide to an Isotropic Waveguide with HS Walls	274
6	Conclusion	278
	References	279

Chapter 11. TOPOLOGICAL WAVELENGTH SHIFTS [ELECTROMAGNETIC FIELD IN LOBACHEVSKIAN GEOMETRY]

J. G. von Brzeski and V. von Brzeski

1	Introduction	282
2	Some Facts About Lobachevskian Geometry	282
3	Geometric Analysis of Spectral Shifts due to Lobachevskian Space. Method of Horospheres	284
4	Representation of Lobachevskian Geometry by Velocity Space. Significance of Horospheres for Physics	288
5	Representation of Lobachevskian Geometry by Configuration Space — Lobachevskian Vacuum	291

6	The Lower Bound of Experimental Detection of the Curvature of Hyperbolic Vacuum	294
7	Homogeneous Space of Horospheres. Application to Cosmic Microwave Background Radiation (CMBR) ..	296
8	Conclusions	297
	Acknowledgment	297
	References	298

Chapter 12. FINITE DIFFERENCE TIME DOMAIN MODELING OF LIGHT AMPLIFICATION IN ACTIVE PHOTONIC BAND GAP STRUCTURES

A. D’Orazio, V. De Palo, M. De Sario, V. Petruzzelli, and F. Prudenzano

1	Introduction	300
2	FDTD Modeling of PBG Structures with Lorentzian Gain Media	303
3	1D PBG Structure Simulation Results	305
4	2D PBG Structure Numerical Results	316
5	Conclusion	326
	Appendix A. 2D FDTD Algorithm for Active Materials	326
	Appendix B. PML Termination for Conductive Dispersive Media	330
	References	337
