CONTENTS

Chapter 1. THE TEM-MODE BANDWIDTH OF TWO-CONDUCTOR OPEN TRANSMISSION LINES

H. E. Green

1	Introduction	2
2	Some Preliminary Physics	5
3	The TE-like Mode in Parallel Plate Line	6
4	The TE-like Leaky Mode in Two-wire Transmission Line	11
5	TM-like Leaky Modes in Parallel Plate and Two-wire Lines	14
6	Conclusion	17
	Acknowledgment	17
	Appendix A. Determination of G Attributable to the External Region of a Parallel Plate Line	18
	Appendix B. Finding the Elemental Inductance and Capacitance	20
	Appendix C. On Finding the Area of a Certain Closed Figure	21
	Appendix D. Determination of the Capacitance Attributable to an Element of Cross-section in a Two-wire Line	22
	Appendix E. Determination of G Attributable to the Exterior Region of a Two-wire Line	24
	References	27

Chapter 2. STRIPLINE TRANSITION TO RIDGE WAVEGUIDE BANDPASS FILTERS

M. A. El Sabbagh, H.-T. Hus, K. A. Zaki, P. Pramanick, and T. Dolan

1	Introduction	30
2	Modeling	31
2.1	Eigenmodes	32
2.2	Generalized Scattering Matrix	33
2.3	Stripline to Ridge Waveguide Discontinuity	33
2.4	Stripline to Ridge Waveguide Transition	35

2.5	Filter Design	36
3	Numerical Results	38
3.1	Stripline to Single Ridge Waveguide Discontinuity	38
3.2	Back to Back Transitions	39
3.3	Input/Output Coupling	41
3.4	Filter Design	44
4	Conclusion	48
Appendix A.		49
References		52

Chapter 3. SPATIAL CORRELATION FUNCTIONS FOR FIELDS IN THREE-DIMENSIONAL RAYLEIGH CHANNELS

Ph. De Doncker

1	Introduction	56
2	Integral Representation of the Rayleigh Channel	57
3	The Spatial Correlation Functions	59
3.1	Spatial Correlation for Fields	59
3.2	Spatial Correlation for Spherical Components	60
3.3	Spatial Correlation for Cartesian Components	61
3.4	Cross-Correlations	66
4	Conclusion	68
References		68

Chapter 4. LENGTH REDUCTION OF EVANESCENT-MODE RIDGE WAVEGUIDE BANDPASS FILTERS

T. Shen and K. A. Zaki

1	Introduction	72
2	Generalized Filter	74
2.1	Modeling, Optimization, and Synthesis	74
2.2	Cross-Section Configuration of Ridge Waveguide	76
2.3	Length Reduction: Table 1	78
2.4	Length Reduction: Table 2	81
2.5	Further Discussion	82
2.6	Spurious Response Consideration	83
3	Folded Filter	83
3.1	Modeling and Synthesis	83

3.2 Design Example	88
4 Summary	88
References	89

Chapter 5. ELECTROMAGNETIC SCATTERING BY A MULTILAYER GYROTROPIC BIANISOTROPIC CIRCULAR CYLINDER

M. Zhang, T. S. Yeo, L. W. Li, and M. S. Leong

1 Introduction	92
2 Formula	93
2.1 The Wave Equations	93
2.2 The Eigenfunction Expansion	94
2.3 Recursive Relationship of Expansion Coefficients	98
3 Numerical Results	102
4 Conclusion	110
References	110

Chapter 6. ELECTROMAGNETIC SCATTERING FROM A DIELECTRIC CYLINDER WITH MULTIPLE ECCENTRIC CYLINDRICAL INCLUSIONS

H. Toyama, K. Yasumoto, and T. Iwasaki

1 Introduction	114
2 Formulation of the Problem	115
3 Numerical Examples	120
4 Conclusions	128
Acknowledgment	129
References	129

Chapter 7. RADIO PROPAGATION IN RURAL RESIDENTIAL AREAS WITH VEGETATION

N. Blaunstein, D. Censor, D. Katz, A. Freedman, and I. Matityahu

1 Introduction	132
2 3D-Stochastic Model of Wave Scattering in Mixed Areas with Vegetation	134
2.1 Model Description	135
2.2 Main Equations	135

2.3	The Problem of Single Scattering and Diffraction	137
3	Comparison between 3D-Stochastic Models and Experimental Data	144
3.1	Description of Experiments	144
3.2	Comparison with Experimental Data	145
3.3	Sensitivity Analysis	147
4	Summary	150
	References	150

Chapter 8. MODE TRANSFIGURATIONS IN CHIROWAVEGUIDES

G. I. Komar and A. Y. Poyedinchuk

1	Introduction	156
2	The Field Representation in an Infinite Chiral Medium	157
3	The Modes of the Parallel-Plate Chirrowaveguide — The Rigorous Analysis	159
4	The Modes of the Parallel-Plate Chirrowaveguide — the Heuristic Approach	163
5	Results Consideration	166
6	Coupled Modes, Mode Transfigurations	169
7	Conclusion	172
	Acknowledgment	174
	References	174

Chapter 9. POTENTIAL OF REFLECTED GNSS SIGNALS FOR ICE SHEET REMOTE SENSING

M. Wiehl, B. Legrésy, and R. Dietrich

1	Introduction	179
2	A Model for GPS Ice Reflection	180
2.1	Basic Concepts	180
2.2	Ice Surface Reflection	182
2.3	Subsurface Reflection	183
2.4	Evaluation of Model Parameters	186
3	Numerical Simulations	188
3.1	General Approach	188
3.2	Simulation Description	188
4	Results	189

4.1	Simulated Measurement Scenarios	189
4.2	Qualitative Studies with Idealised Interfaces	190
4.3	Account for Topographic and Roughness Variations	196
4.4	Focussing on Subzones	197
5	Conclusions	200
	Acknowledgment	201
	References	202

Chapter 10. ELECTROMAGNETIC SCATTERING FROM A CIRCULAR TARGET ABOVE OR BELOW ROUGH SURFACE

X. Wang, C.-F. Wang, Y.-B. Gan, and L.-W. Li

1	Introduction	208
2	Description of the Statistical Surface	209
3	Electromagnetic Scattering from Targets Located above or below a Rough Surface (Vertical Polarization or TM Case)	210
3.1	Formulation for EM Scattering from Targets Located above a Rough Surface	210
3.2	Formulation for EM Scattering from Targets Located below a Rough Surface	213
4	Detection of Targets below a Rough Surface	216
5	Analysis on the Statistical Characteristics of the Composite Scattered Field	216
6	Numerical Results and Discussions	217
6.1	Validation and Efficiency of the Computations	217
6.2	Discussions	219
7	Conclusions	224
	References	225

Chapter 11. RADIO WAVE PROPAGATION IN PERPENDICULAR STREETS OF URBAN STREET GRID FOR MICROCELLULAR COMMUNICATIONS. PART I: CHANNEL MODELING

H. M. El-Sallabi and P. Vainikainen

1	Introduction	230
2	Analytical Model	231
2.1	Channel Transfer Function	232

3	Numerical Results	243
4	Conclusion	252
	References	252

Chapter 12. A NOTE ON THE BACKWARD SCATTERING THEOREM

J. A. Grzesik

1	Overview	256
2	Spectral Field Representation	257
3	An Asymptotic Lemma	259
4	Far Fields	261
5	A Forward/Backward view of the Optical Theorem ..	262
6	The Electromagnetic Optical Theorem in Two-Dimensional Scattering	264
7	A Simple Example: Perpendicular Incidence upon a Perfectly Conducting, Circular Cylinder	266
	References	268

Chapter 13. PHYSICAL SPLINE FINITE ELEMENT (PSFEM) SOLUTIONS TO ONE DIMENSIONAL ELECTROMAGNETIC PROBLEMS

X. Zhou

1	Introduction	272
2	Variational Formulation of General 1D Problems	274
3	Physical Spline Expansion and Its Finite Element Implementation	275
4	Numerical Examples	280
	4.1 A Simple Lossy Direct-Current Transmission Line	281
	4.2 Wave between Parallel Plates	283
	4.3 Reflection from a Grounded Dielectric Slab at Normal Incidence	284
	4.4 Reflectionless Slab- E_z Polarized and Normal Incidence .	286
	4.5 Design of Planar Absorbing Layers	287
5	Concluding Remarks	292
	Acknowledgment	293
	References	293

**Chapter 14. A PRACTICAL APPROACH TO
MODELING DOUBLY CURVED CONFORMAL
MICROSTRIP ANTENNAS**

C. A. Macon, K. D. Trott, and L. C. Kempel

1	Introduction	296
2	Formulation of a Full-Wave Solution	297
3	Drawbacks to the Full-Wave Approach	300
4	FE-BI Formulation	302
5	Numerical Results of the FE-BI Solution	308
6	Conclusions	313
	References	313

**Chapter 15. SCATTERING BY A GYROTROPIC
BIANISOTROPIC CYLINDER OF ARBITRARY
CROSS SECTION: AN ANALYSIS USING
GENERALIZED MULTIPOLE TECHNIQUE**

M. Zhang, L. W. Li, T. S. Yeo, and M. S. Leong

1	Introduction	316
2	Theoretical Formulation	317
	2.1 Electromagnetic Fields in GBM Excited by Longitudinal Electric and Magnetic Currents	317
	2.2 GMT Solution	320
3	Numerical Results and Discussions	322
	3.1 Circular Chiral Cylinder	322
	3.2 Square Chiral Cylinder	324
	3.3 Circular GBM Cylinder	324
	3.4 GBM Lens Cylinder	329
4	Conclusion	331
	References	332
