CONTENTS

Chapter 1. NON-RELATIVISTIC SCATTERING IN THE PRESENCE OF MOVING OBJECTS: THE MIE PROBLEM FOR A MOVING SPHERE

D. Censor

1	Introduction and Roadmap	2
2	Mathematical Overview	4
3	The Boundary Value Problem for a Moving Sphere ..	8
4	Calculation of the Velocity-Dependent Terms	13
5	Calculation of the Scattering Coefficients	23
6	The Scattered Field of a Moving Sphere	27
7	Summary and Concluding Remarks	29
8	List of Frequently Used Abbreviations	31
	References	31

Chapter 2. PERIODIC OPEN RESONATORS: PECULIARITIES OF PULSE SCATTERING AND SPECTRAL FEATURES

A. Perov, Y. Sirenko, and N. Yashina

1	Introduction	34
2	Basic Model Problem and Diffraction Resonance Modes in FD	35
3	Transition into TD. Relation of Stationary and Non-Stationary Signals	37
4	Results of Numerical Experiments	38
5	Broad Band Pulses Scattering	47
6	Pulse Propagation in Regular Sections of Floquet Channels	55
7	Conclusion	73
	References	73

Chapter 3. CONTACT GEOMETRY IN ELECTROMAGNETISM

M. Dahl

1	Introduction	78
2	Helicity and Beltrami Fields	80
3	The Helicity Decomposition	82
	3.1 The Moses Decomposition	84
4	Helicity Decomposition in Electromagnetics	85
	4.1 Decomposition of Maxwell's Equations	85
	4.2 Decomposition of the Constitutive Equations	88
	4.3 Scalar Formulation for Electromagnetics	89
5	Contact Geometry	90
	5.1 Contact Structures	91
	5.2 Contact Structures, Beltrami Fields, and Helicity	93
	5.3 Darboux's Theorem for Contact Structures	95
	5.4 The Carnot-Carathéodory Metric	95
6	Contact Geometry from Helmholtz's Equation	96
	6.1 Contact Structures from Planewaves	96
	6.2 Contact Structures in a Rectangular Waveguide	97
	6.3 Local Invariance of Helmholtz's Equations	99
7	Conclusions	100
	Acknowledgment	102
	References	102

Chapter 4. DESIGN OF SWITCHED BEAM PLANAR ARRAYS USING THE METHOD OF GENETIC ALGORITHMS

S. A. Mitilineos, C. A. Papagianni, G. I. Verikaki, and C. N. Capsalis

1	Introduction	106
2	Theoretical Model	108
	2.1 Dipoles, Array Factor and EMF Method	108
	2.2 The Objective Function of the Genetic Algorithm	110
3	Numerical Results	111
4	Conclusions	124
	References	124

**Chapter 5. PHASE CENTRE OPTIMIZATION IN
PROFILED CORRUGATED CIRCULAR HORNS
WITH PARALLEL GENETIC ALGORITHMS**

L. Lucci, R. Nesti, G. Pelosi, and S. Selleri

1	Introduction	128
2	Design Parameters	129
3	Cost Function	132
4	Parallel GA	134
5	Optimization Results	135
6	Conclusions	140
	Acknowledgment	140
	References	140

**Chapter 6. SOLVING MIXED
DIELECTRIC/CONDUCTING SCATTERING
PROBLEM USING ADAPTIVE INTEGRAL METHOD**

W.-B. Ewe, L.-W. Li, and M.-S. Leong

1	Introduction	144
2	Formulation	145
	2.1 Mixed Dielectric Objects	145
	2.2 Mixed Conducting-Dielectric Body	148
	2.3 Method of Moments	150
	2.4 Adaptive Integral Method	152
3	Numerical Result	154
4	Conclusion	159
	Acknowledgment	159
	References	161

**Chapter 7. ANALYSIS OF RESONANCE AND QUALITY
FACTOR OF ANTENNA AND SCATTERING
SYSTEMS USING COMPLEX FREQUENCY
METHOD COMBINED WITH MODEL-BASED
PARAMETER ESTIMATION**

L. Li and C.-H. Liang

1	Introduction	166
2	Complex Resonant Frequency	167
3	Model-Based Parameter Estimation Technique	168

4	Generalized System Function and Pole-Zero Characteristics	170
5	Resonant Frequency, Quality Factor Q , and Residues of Open Systems	172
6	Time Domain Response	174
7	Applications and Discussion	175
8	Conclusion	186
	References	186

Chapter 8. NONLINEAR WAVES IN DOPED MATERIAL WITH UNIAXIAL ELECTRICAL-MAGNETIC COUPLING

D. Cheng

1	Introduction	190
2	Formulations for the Doped Nonlinear Material with Transversely Uniaxial Electrical-Magnetic Coupling .	191
	2.1 Coupled Differential Equations	192
	2.2 Nonlinear Wave Solutions	193
3	Formulations for the Doped Nonlinear Material with Longitudinally Uniaxial Electrical-Magnetic Coupling	194
4	Numerical Examples	196
5	Concluding Remarks	198
	Acknowledgment	200
	References	200

Chapter 9. NUMERICAL AND EXPERIMENTAL VALIDATIONS OF IEM FOR BISTATIC SCATTERING FROM NATURAL AND MANMADE ROUGH SURFACES

F. Koudogbo, P. F. Combes, and H.-J. Mametsa

1	Introduction	205
2	Surface Scattering Coefficient Calculation for Small or Moderate Roughness ($ks_z \leq 2$)	206
	2.1 Model Development	206
	2.2 Coherent Scattering Coefficient Calculation	209
	2.3 Incoherent Scattering Coefficient Calculation	211
	2.4 Surface Scattering Coefficient Summary	215

3	Numerical Simulations by IEM, SPM and KM of the Surface Scattering Coefficient Behavior, Compared with MM and Experimental Data	217
3.1	The Backscattering Case	217
3.2	The Bistatic Case	222
3.3	Conclusion on the Numerical Study	227
4	Experimental Illustrations of the Surface Scattering Coefficient Behavior and IEM Validation	227
4.1	Presentation of the Measurements Setup	227
4.2	Characterization of the Samples	228
4.3	Results of the Experimental Study in Backscattering and Forward Scattering	232
5	Conclusion	236
	Acknowledgment	237
	Appendix A. The Field Coefficients Expressions	237
	A.1 Expressions of Kirchhoff Coefficients	237
	A.2 Expressions of Complementary Coefficients	238
	References	241

Chapter 10. RIGOROUS AND FAST CONVERGENT ANALYSIS OF A RECTANGULAR WAVEGUIDE COUPLER SLOTTED IN COMMON WALL

H. Jia, K. Yoshitomi, and K. Yasumoto

1	Introduction	245
2	Formulation	246
3	Numerical Results and Discussion	254
4	Conclusion	261
	References	261

Chapter 11. A GENERAL FRAMEWORK FOR CONSTRAINT MINIMIZATION FOR THE INVERSION OF ELECTROMAGNETIC MEASUREMENTS

T. M. Habashy and A. Abubakar

1	Introduction	267
2	The Cost Function	269
3	Constrained Minimization	270
4	Normalization of the Vector of Residuals	270

5	The Newton Minimization Approach	271
5.1	Case (1): $\overline{\mathbf{G}}$ is Singular	272
5.2	Case (2): $\overline{\mathbf{G}}$ Is Nonsingular	273
6	A Modified Newton Method	274
7	The Gauss-Newton Minimization Approach	275
8	The Steepest-Descent Method	276
9	Line Searches	279
10	The Choice of the Lagrange Multiplier	281
11	Update Formulas for the Hessian	286
11.1	The Rank-One Matrix Update	287
11.2	The Rank-Two Matrix Updates	287
12	Criterion for Terminating the Iteration	289
13	Regularization	290
13.1	L_1 -Norm	290
13.2	Maximum Entropy.....	291
14	The Weighted Least Squares Minimization in the Framework of Stochastic Estimation	291
14.1	Preliminaries.....	291
14.2	The Fisher Information Matrix	294
14.3	The Estimator's Covariance Matrix and the Cramer-Rao Lower Bound	296
15	Numerical Examples	298
15.1	Example 1	299
15.2	Example 2	302
16	Conclusions	306
	Acknowledgment	306
	Appendix A. Nonlinear Transformations for Constrained Minimization	306
A.1	First Transformation	306
A.2	Second Transformation	307
A.3	Third Transformation	309
	References	309

**Chapter 12. INHOMOGENEOUS MAGNETIC MEDIA:
WAVE PROPAGATION AND MAGNETIC
PERMEABILITY RECONSTRUCTION**

K. Baganás

1	Introduction	314
2	Maxwell's Equations in Inhomogeneous Media	316
3	Wave Propagation in a Rectangular Waveguide	320
4	The Direct Problem for a System of Rectangular Waveguides	321
	4.1 Computation of the Field Components	321
	4.2 Agreement with Existing Solutions	324
	4.3 Cut-Off Frequencies	326
5	Solving the Inverse Problem	328
6	Numerical Results	328
	6.1 Experiment Setup	329
	6.2 Amplitude & Phase Parts Measurement	331
7	Conclusions	332
	References	332
