CONTENTS

THE PROPAGATION PROBLEM IN A BI-ISOTROPIC WAVEGUIDE*A. D. Ioannidis, G. Kristensson, and D. Sjöberg*

1	Introduction	21
2	Prerequisites	24
3	Waveguides and Boundary Condition	25
4	The Spectral Problem	27
5	Formulation	28
6	Solvability	30
7	The Null-field Equations	32
8	The Circular Geometry	34
9	Numerical Illustration	35
10	Conclusion	38

DEGREE OF ROUGHNESS OF ROUGH LAYERS: EXTENSIONS OF THE RAYLEIGH ROUGHNESS CRITERION AND SOME APPLICATIONS*N. Pinel, C. Bourlier, and J. Saillard*

1	Introduction	41
2	Estimation of the Electromagnetic Roughness of Rough Surfaces	42
3	Extension of the Rayleigh Roughness Parameter to the Transmission Through a Rough Surface	45
4	Extension of the Rayleigh Roughness Parameter to the Reflection from a Rough Layer	48
5	Application to the Coherent Scattered Intensities Attenuation under the TPA	54
6	Conclusion	57
	Appendix A. Rigorous Calculation for Uncorrelated Rough Surfaces	57

SINGLE-MODE PROPAGATION OF LIGHT IN ONE DIMENSIONAL ALL-DIELECTRIC LIGHT-GUIDING SYSTEMS

C. Wang

1	Introduction	65
2	Classifications of Planar Light-guiding Systems and Electromagnetic Modes	68
3	Numerical Results with Theoretical Analysis	71
4	Conclusions and Remarks	83
	Appendix A. Transverse Resonance Condition	86
	Appendix B. Sufficient and Necessary Conditions for Intrinsic Light-speed Points	88

EQUATION SOLUTION FOR THE CURRENT IN RADIAL IMPEDANCE MONOPOLE ON THE PERFECTLY CONDUCTING SPHERE

M. V. Nesterenko, D. Y. Penkin, V. A. Katrich, and V. M. Dakhov

1	Introduction	95
2	Problem Formulation and Initial Integral Equations	96
3	Equation Solution for the Current by the Method of Consistent Iterations	98
4	Radiation Fields of the Radial Impedance Vibrator on the Perfectly Conducting Sphere	104
5	Numerical Results	107
6	Conclusion	110
	Appendix A. Electrical Dyadic Green's Function for the Unbounded Space outside the Perfectly Conducting Sphere	110

ELECTROMAGNETIC EIGENMODES IN MATTER. VAN DER WAALS-LONDON AND CASIMIR FORCES

M. Apostol and G. Vaman

1	Introduction	115
2	Surface Plasmons. Van Der Waals-London Forces	118
3	Surface Plasmon-polariton Modes. Casimir Force	121
4	Discussion and Conclusion	127

DISPERSION OF ELECTROMAGNETIC WAVES GUIDED BY AN OPEN TAPE HELIX II

N. Kalyanasundaram and G. Naveen Babu

1	Introduction	133
2	Derivation of the Dispersion Equation	134
3	Numerical Solution of the Truncated Dispersion Equation	141
4	Conclusion	150

MODE EXPANSION IN TIME DOMAIN FOR CONICAL LINES WITH ANGULAR MEDIUM INHOMOGENEITY

A. Y. Butrym and B. A. Kochetov

1	Introduction	151
2	Mode Basis in Spherical Coordinate System	153
3	System of Evolutionary Waveguide Equations	164
4	Algorithm of Solving a Problem by the Method of Mode Expansion in Time Domain	168
5	Conclusions	168
	Appendix A. Operator ∇_{\perp} in Spherical Coordinate System	169
	Appendix B. Gauss-Ostrogradsky Formula for Angular Domains	170
	Appendix C. Green's Formula for Angular Domains	171
	Appendix D. Proof of Symmetry of Operators W_H, W_E	172

ELECTROMAGNETIC FIELDS IN A CAVITY FILLED WITH SOME NONSTATIONARY MEDIA

M. S. Antyufeyeva and O. A. Tretyakov

1	Introduction	177
2	Problem Statement and Governing Equations for Transient Electromagnetic Fields	179
3	Cavity With Time-varying Permittivity	182
4	Cavity with Time-varying Conductivity	193
5	Conclusion	201

NONLINEAR PULSE PROPAGATION IN A WEAKLY BIREFRINGENT OPTICAL FIBER PART 1: DERIVATION OF COUPLED NONLINEAR SCHRODINGER EQUATIONS (CNLSE)

N. Kalyanasundaram and P. Muthuchidambaranathan

1	Introduction	205
---	------------------------	-----

2	A Model for Birefringence	207
3	Problem Formulation	211
4	Perturbation Solution	219
5	Discussion and Conclusions	229

FREQUENCY DISPERSION LIMITS RESOLUTION IN VESELAGO LENS

R. E. Collin

1	Introduction	233
2	Analysis-single Interface	240
3	Solution for the Two Interface Problem	244
4	Conclusion	259

NOVEL LIQUID CRYSTAL TUNABLE FLAT-TOP OPTICAL INTERLEAVER

S. A. Alboon, A. S. Abu-Abed, R. G. Lindquist, and H. R. Al-Zoubi

1	Introduction	264
2	Device Concept	265
3	Liquid Crystal Tunable Interleaver	268
4	Tolerance Analysis	271
5	Polarization Diversity	277
6	Interleaver Fabrication and Experimental Results	277
7	Conclusion	281

NOVEL METHOD TO ANALYZE AND DESIGN ONE-DIMENSIONAL RECIPROCAL PERIODIC STRUCTURES WITH SYMMETRICAL CELLS

O. Zandi, Z. Atlasbaf, and M. S. Abrishamian

1	Introduction	285
2	Dispersion Relation of a Periodically Loaded Transmission Line	286
3	Phase and Group Velocities	288
4	Interpretation of the Tardiness Radius and Direction	289
5	Design Procedure in the Tardiness Space	291
6	Symmetrical Cells	294
7	Simulation	299
8	Conclusion	302

PLANAR ANTENNAS FOR PASSIVE UHF RFID TAG

A. Kumar, D. Parkash, and M. V. Kartikeyan

1	Introduction	305
2	Antenna Structure	307
3	Results Study	309
4	Fabrication and Test Results	324
5	Conclusion	326

WEAKLY CONDITIONALLY STABLE AND UNCONDITIONALLY STABLE FDTD SCHEMES FOR 3D MAXWELL’S EQUATIONS

J. Chen and J. G. Wang

1	Introduction	329
2	Formulations	331
3	comparison	355
4	Conclusion	363

MINIMUM USAGE OF FERRITE TILES IN ANECHOIC CHAMBERS

S. M. J. Razavi, M. Khalaj-Amirhosseini, and A. Cheldavi

1	Introduction	367
2	Modeling Technique	368
3	Results	374
4	Conclusion	381

EFFECTS OF GEOMETRY ON AMPLIFICATION PROPERTY OF ERBIUM DOPED HOLEY FIBER AMPLIFIERS USING SCALAR EFFECTIVE INDEX METHOD

M. Karimi and F. E. Seraji

1	Introduction	386
2	Erbium Doped Holey Fiber Modeling	388
3	Simulation Results and Discussions	390
4	Conclusion	399

IMPROVED CFO ALGORITHM FOR ANTENNA OPTIMIZATION

R. A. Formato

1	Introduction	405
2	CFO Results for Variable Length Center-fed Dipole	406
3	Improved CFO Algorithm	411
4	Analytical Benchmarks	418
5	Conclusion	421
	Appendix A. CFO Theory	422

DIELECTRIC RESONATOR ANTENNA MOUNTED ON A CIRCULAR CYLINDRICAL GROUND PLANE

S. H. Zainud-Deen, H. A. Malhat, and K. H. Awadalla

1	Introduction	427
2	Methods of Solution	428
3	Single-element CDRA Mounted on a Circular Cylindrical Structure	429
4	Mutual Coupling between Two Identical CDRA's Mounted on a Circular Cylinder Structure	435
5	CDRA's with Defected Ground Cylindrical Structure	438
6	Conclusion	442

A DOMAIN DECOMPOSITION METHOD BASED ON A GENERALIZED SCATTERING MATRIX FORMALISM AND A COMPLEX SOURCE EXPANSION

E. Martini, G. Carli, and S. Maci

1	Introduction	445
2	Formulation for Arbitrary Wave Object Bases	448
3	Degrees of Freedom and Number of Connected Ports	455
4	Implementation with Complex Point Source Beams as Wave Objects	457
5	Considerations on the Computational Cost	461
6	The Special Case of Iterative Physical Optics	464
7	Conclusion	467
	Appendix A. Calculation of the GSM, the GTM and $\underline{b}^{(0)}$	468
