Chief Editors: Weng Cho Chew and Sailing He

EMW Publishing
Cambridge, Massachusetts, USA
CONTENTS

Dyadic Point Spread Functions for 3D Inverse Source Imaging Based on Analytical Integral Solutions
Georg Schnattinger and Thomas F. Eibert ................................................................. 1

Lightning Responses on a Finite Cylindrical Enclosure

Analysis of Microstrip Line Feed Slot Loaded Patch Antenna Using Artificial Neural Network
Mohammad Aneesh, Jamshed A. Ansari, Ashish Singh, Kamakshi, and Saiyed S. Sayeed ...... 35

Parallel Implementation of Hybrid GSA-NM Algorithm for Adaptive Beam-Forming Applications
Korany R. Mahmoud and Safwat Hamad ................................................................. 47

Optimization of a Dual Ring Antenna by Means of Artificial Neural Network
Linh H. Manh, Francesco Grimaccia, Marco Mussetta, and Riccardo E. Zich .................. 59

A Compact Diplexer Based on Low Profile Multilayer FSS Filters for Ultra-High Data Rate Point to Point Wireless Communication System
Tao Zhang and Habiba Hafdallah Ouslimani ............................................................ 71

A New Design of Dual-Port Active Integrated Antenna for 2.4/5.2 GHz WLAN Applications
Arash Valizade, Pejman Rezaei, and Ali A. Orouji .................................................. 83

An Approximate Approach to Determining the Permittivity and Permeability near $\lambda/2$ Resonances in Transmission/Reflection Measurements
Sung Kim and James Baker-Jarvis .................................................................................. 95

Printed Egg Curved Slot Antennas for Wideband Applications
Sudhanshu Verma and Preetam Kumar ....................................................................... 111

Electromagnetic Interactions Analysis between Two 3-D Scatterers Using the E-PILE Method Combined with the PO Approximation
Mohammad Kouali, Gildas Kubické, and Christophe Bourlier .................................... 123

Huygens Principle Based Imaging of Multilayered Objects with Inclusions
Navid Ghavami, Gianluigi Tiberi, David J. Edwards, Ahmad Safaai-Jazi, and Agostino Monorchio139

On the Suitability of Using Halbach Arrays as Potential Energy Storage Media
Daniel Månsson ........................................................................................................ 151

Geometrical and Physical Parameters Affecting Distant Electric Fields Radiated by Lightning Return Strokes
Carlo Petrarca ........................................................................................................... 167
Design of a Compact Ultra-Wide Band Bow-Tie Slot Antenna System for the Evaluation of Structural Changes in Civil Engineering Works
Florence Sagnard ............................................................. 181

Regularization Imaging Algorithm with Accurate G Matrix for Near-Field MMW Synthetic Aperture Imaging Radiometer
Jianfei Chen, Yuehua Li, Jianqiao Wang, Yuanjiang Li, and Yilong Zhang ......................... 193

An Improved Methodological Approach for Denoising of Partial Discharge Data by the Wavelet Transform
Carlo Petrarca and Giovanni Lupò ........................................ 205

Design and Analysis of Permanent Magnet Motor with Movable Stators
Chun-Chi Lai, Tzong-Shi Liu, and Ming-Tsan Peng ................................................ 219

Integration of Leaky and Surface Waves in a 2D Gaussian Beam Formalism for Antenna-Structure Coupling
Olivier Balosso, Jerome Sokoloff, and Sylvain Bolioli .............................................. 233

Model Predictive Direct Torque Control for SPMSM with Load Angle Limitation
Mingdi Fan, Hui Lin, and Tianyi Lan ......................................................... 245

Discrimination of Free Space and Subsurface Canonical Metallic Targets Using Hybrid E-Pulse Method
Dhiraj K. Singh, Naveena Mohan, Devendra C. Pande, and Amitabha Bhattacharya .............. 257
