EMW Publishing
Cambridge, Massachusetts, USA
CONTENTS

Design of a Miniaturized Zeroth- and First-Order Resonant Antenna with Mushroom Cells and Interdigital Capacitors
Ke Li, Yuan-Ming Cai, Long Li, and Chang-Hong Liang .................................................. 1

Novel High-Selectivity Dual-Band Substrate Integrated Waveguide Filter with Multi-Transmission Zeros
Guo-Hui Li, Xiao-Qi Cheng, Hao Jian, Huan-Ying Wang .................................................. 7

Wideband Vertical Planar Printed Unidirectional Antenna
Chao Wang, Lei Chen, Hao Wang, and Xiaowei Shi ......................................................... 13

Electromagnetically Induced Absorption in Metamaterials in the Infrared Frequency
Sharhabeel Alyones .............................................................................................................. 19

Magnetic Substrate Folded Dipole Antenna for UHF RFID Metal Tag
Mengran Guan, Difei Liang, Xin Wang, Yong Wang, and Longjiang Deng ....................... 25

Two Uniform Linear Arrays for Non-Coherent and Coherent Sources for Two Dimensional Source Localization
Muhammad Omer, Nizar Tayem, and Ahmed A. Hussain .................................................. 31

Elimination of Current Crowding Problem in Flat Conductors Bent at Arbitrary Angles
Tatiana Gerasimenko, Petr Polyakov, and Igor Frolov ..................................................... 41

Multiband Antenna Based on Loading a CPW-Fed Monopole with One CRLH-TL Unit Cell
Hai-Peng Li, Guang-Ming Wang, Xiang-Jun Gao, and Xiao-Fei Zhang ......................... 47

A Novel Ultra-Wideband Rotated Cross Monopole Antenna for Wireless Communication
Jian Ren, Quan Fang, and Yingzeng Yin ............................................................................... 55

Analysis of Excitation Pulsed Signal Propagation for Atom Probe Tomography System
Blaise Ravelo and Francois Vurpillot ...................................................................................... 61

High Frequency Electrical Characterization of 3D Signal/Ground through Silicon Vias
Steve Adamshick, Robert Carroll, Megha Rao, Douglas La Tulipe, Seth Kruger, John Burke,
and Michael Liehr .................................................................................................................. 71

A Novel Dual-Band Dual-Polarized Ortho-Mode Transducer
Maomi Feng, Huili Zheng, Huan Lin, Qi Deng, and Mengmeng Yuan ........................... 77

Ferrite-Loaded Half Mode Substrate Integrated Waveguide Phase Shifter
Yu Jian Cheng, Qiu Dong Huang, Ye Di Zhou, and Cheng Xiang Weng ....................... 85
A Dual Ultra Wide Band Slotted Antenna for C and X Bands Application  
Mourad Meloui and Mohammad Essaaidi .................................................. 91

A Modified Generalized Memory Polynomial Model for RF Power Amplifiers  
Gang Sun, Cuiping Yu, Yuanan Liu, Shulan Li, and Jiuchao Li ....................... 97

Design of Compact Asymmetric Coplanar Strip-Fed UWB Antenna with Dual Band-Notched Characteristics  
Long Chen, Yuan-Fu Liu, and Pu-Chao Wu ................................................. 103

A Novel Compact Wideband Bandpass Filter Using Rotational Symmetric Loaded Structure  
Kai Wang, Yuan-Yuan Li, and Sai Wai Wong .............................................. 111

A Reflectarray Based on the Folded SIR Patch-Slot Configuration Backed on FSS for Low RCS  
Mohammad M. Fakharian, Pejman Rezaei, and Ali A. Orouji ........................ 119

A Dual Beam Scanning Microstrip Antenna  
Jie-Huang Huang and Christina F. Jou ....................................................... 125

Low Profile Dual-Polarized Circular Patch Antenna with an AMC Reflector  
Jian Ren, Bo Wang, and Yingzeng Yin ....................................................... 131
