## CONTENTS

Microstrip Dual-Band Bandpass Filter Using U-Shaped Resonators  
Eugene A. Ogbodo, Yi Wang, and Kenneth S. K. Yeo ........................................ 1

A Compact Dual-Polarized Antenna for Base Station Application  
Guan-Feng Cui, Shi-Gang Zhou, Shu-Xi Gong, and Ying Liu .............................. 7

Seven-Band Comb-Shaped Microstrip Antenna for Wireless Systems  
Kaushik Mandal ................................................................................. 15

A Novel Compact Microstrip UWB Bandpass Filter with Improved Out-of-Band Rejection  
Yong-Qin Liu and Xi-Zheng Ke ............................................................. 21

Optimal Design of a Ku/Ka-Band Wide-Flare-Angle Corrugated Horn Using the Differential Evolution Algorithm  
Lei Xie, Yong-Chang Jiao, Biao Du, Ze-Yu Meng, and Yan Shi .......................... 27

Research on Minimum Energy Excited to Plasma Coating for Reducing Radar Cross Section of Target  
Dan Cheng, Hong-Cheng Yin, and Hong-Xing Zheng ....................................... 35

Wideband Dual-Polarized Dipole Antenna with Differential Feeds  
Jiao-Jiao Xie and Qian Song .................................................................. 43

Design of Dual Band-Notched CPW-Fed UWB Planar Monopole Antenna Using Microstrip Resonators  
Hany A. Atallah, Adel B. Abdel-Rahman, Kuniaki Yoshitomi, and Ramesh K. Pokharel .... 51

A Wideband Transmitarray Using Double-Petal Loop Elements  
Chao Tian, Yong-Chang Jiao, and Gang Zhao ................................................. 57

Mutual Coupling Reduction between Printed Dual-Frequency Antenna Arrays  
Lin Li, Yantao Yu, and Lijun Yi .................................................................. 63

The Research of Reciprocal Relations for Nonlinear Quadripole in the Magnetic Field  
Vyacheslav Ignatjev, Andrey Orlov, and Sergey Perchenko .............................. 71

A New Design Method for Patch Antenna with Low RCS and High Gain Performance  
L.-L. Cong, X.-Y. Cao, W.-Q. Li, and Y. Zhao .............................................. 77

Compact Broadband Bandpass Filter on Quarter-Mode Substrate Integrated Waveguide Loaded with CRLH Interdigital Slots  
Zhihua Wei, Jie Huang, Yanhui Geng, Jing Li, and Guoqing Xu ......................... 85
Ka-band Radiation Pattern Reconfigurable Antenna Based on Microstrip MEMS Switches
Zhongliang Deng, Jun Gan, Hao Wei, Hua Gong, and Xubing Guo ................................. 93

A Novel Compact Feeding Network for Array Antenna
Pejman Mohammadi, Asrin Piroutiniya, and Mohamad Hosein Rasekhmanesh .................. 101

Additive Manufacturing of a Dual-Ridged Horn Antenna
Budhaditya Majumdar, David Baer, Sudipta Chakraborty, Karu P. Esselle, and Michael Heimlich 109

Mutual Coupling Reduction between Closely Placed Microstrip Patch Antenna Using Meander Line Resonator
Jeet Ghosh, Sandip Ghosal, Debasis Mitra, and Sekhar Ranjan Bhadra Chaudhuri ............. 115

Microstrip Diplexer Design Using Open/Shorted Coupled Lines
Wenjie Feng, Meiling Hong, and Wenquan Che ......................................................... 123

A Novel Compact Broadband Antenna for LTE/WLAN/WiMAX Applications
Bei-Jun Wu and Quan-Yuan Feng .............................................................. 129

Transformation-Based Flexible Thermal Hose with Homogeneous Conductors in Bilayer Configurations
Tiancheng Han and Yuhang Gao ................................................................. 137
