## CONTENTS

A Novel Wideband Circularly Polarized Patch Array with Meta-Surface  
Rui-Qi Wang, Yong-Chang Jiao, Liang Lu, and Huan Zhang .......................... 1

Polarization Conversion Metasurface for Broadband Radar Cross Section Reduction  
Wen Jiang, Yu Xue, and Shu-Xi Gong .................................................. 9

A Compact Miniaturized Frequency Selective Surface with Stable Resonant Frequency  
Ning Liu, Xian-Jun Sheng, and Jing-Jing Fan .......................................... 17

Wideband Bandpass Filter with Multiple Transmission Zeros Using a Shorted  
Stub-Loaded Stepped-Impedance Ring Resonator  
Qian Yang, Yong-Chang Jiao, Zheng Zhang, and Nan Wang .......................... 23

Quasi-static Vertical Magnetic Field of a Large Horizontal Circular Loop Located at the  
Earth’s Surface  
Mauro Parise ................................................................. 29

A Compact Differential-Fed Half-Elliptic Monopole Antenna with Triple Band-Notched  
function  
Yuan Xu, Hui Li, Yingzeng Yin, and Zhichao Deng .................................... 35

Metal-Frame GPS Antenna for Smartwatch Applications  
Saou-Wen Su and Cheng-Tse Lee ....................................................... 41

A Compact N-Way Wilkinson Power Divider Using a Novel Coaxial Cable  
Implementation for VHF Band  
S. S. Kakatkar, Prafull Irpache, and K. P. Ray ........................................ 49

Studying the Influence of the Number Vanishing Moments of Daubechies Wavelets for  
the Analysis of Microstrip Lines  
Mohamed Bayjja, Mohamed Boussouis, and Naima Amar Touhami ..................... 57

Synthesis of Dual Beam Pattern of Planar Array Antenna in a Range of Azimuth Plane  
Using Evolutionary Algorithm  
Debasis Mandal, Jyotirmay Tewary, Kalyan S. Kola, and Ved P. Roy .................. 65

CPW-Fed Dual-Band MIMO Antenna with Common Radiating Element  
Nan Zhao and Wen-Peng Tian .......................................................... 71

Accurate Extraction of High Quality Factor of Dielectric Resonators from Measurements  
Dajun Lei, Feng Qiu, Jinggui Zhang, Hui Dong, Zhenghua Tang, Jianquan Huang, Min Yao  
and Qing-Xin Chu ................................................................. 77

An Original Method for the Measurement of the Radiated Susceptibility of an Electronic  
System Using Induced Electromagnetic Nonlinear Effects  
Laurent Guibert, Patrick Millot, Xavier Ferrières, and Étienne Sicard .................. 83
A Broadband Circularly Polarized Antenna Based on Cross-Dipoles
Zhanbiao Yang, Xin Huai Wang, Le Kang, Hao Wang, Jianhui Bao, and Xiaowei Shi ............ 91

Broadband Circularly Polarized Slotted Patch Antenna Loaded with Short Pins
Xiangdong An, Jianjun Wu, and Yingzeng Yin ......................................................... 97

Wideband Frequency Selective Surface with a Sharp Band Edge Based on Mushroom-Like Cavity
Tao Zhong, Hou Zhang, Xue-Liang Min, Qiang Chen, and Guo-Cheng Wu .................... 105

A Wideband Horizontally Polarized Omnidirectional Antenna with Coupling Lines
Shilei Zhang and Ming Ye ..................................................................................... 111

Design of Miniaturized and Ultrathin Absorptive/Transmissive Radome Based on Interdigital Square Loops
Bo Yi, Liang Yang, and Peiguo Liu ................................................................. 117

Design of a Compact Planar Quasi-Yagi Antenna with Enhanced Gain and Bandwidth Using Metamaterial
Moumita Sarkar, Tarakeswar Shaw, Rhitam Datta, Pujaayita Saha, and Debasis Mitra ..... 125

Manipulation of One-Dimension Photonic Crystal Spectrum via Perforated Silicon Slab
Borys Chernyshov and Sergei I. Tarapov ............................................................... 133
