EMW Publishing
Cambridge, Massachusetts, USA
# CONTENTS

Bandstop Characteristic of Inclined Straight Slot Embedded in Microstrip Line  
Xiuhua Jin and Xiaodong Huang .......................................................... 1

Substrate Integrated Waveguide without Metallized Wall Posts  
Lindo Ouseph, Anju Mathews, and Aanandan Chandroth .......................... 7

Half-Mode SIW BPF Loaded with S-Shaped Complementary Spiral Resonators  
Feng Wei, Hao Jie Yue, Jing Pan Song, Hong Yi Kang, and Bin Li ............ 13

The Use of the Fractional Derivatives Approach to Solve the Problem of Diffraction of a Cylindrical Wave on an Impedance Strip  
Eldar I. Veliyev, Kamil Karaçuha, Ertuğrul Karaçuha, and Osman Dur .......... 19

Design of Printed Monopole Antenna for Wireless Energy Meter and Smart Applications  
Trushit Upadhyaya, Arpan Desai, and Riki Patel .................................... 27

A Ultra Compact Wideband Bandpass Filter Using a Quadmode Stub-Loaded Resonator  
Zhi-Chong Zhang and Hai-Wen Liu ....................................................... 35

UWB Antennas with Multiple Notched-Band Function  
Bazil Taha Ahmed, Eva Morodo Lasa, Pablo Sanchez Olivares, and José Luis Masa Campos ... 41

A Modified Gysel Power Divider With Arbitrary Power Dividing Ratio  
Shiyong Chen, Guoqiang Zhao, and Yantao Yu ......................................... 51

A Broadband Crossed Dipole Antenna with Wide Axial Ratio Beamwidth for Satellite Communications  
Chao-Qiang Feng, Fu-Shun Zhang, and Fu-Kun Sun .................................... 59

High Q-Factor Narrow-Band Bandpass Filter Using Cylindrical Dielectric Resonators for X-Band Applications  
Reza Karimzadeh-Jazi, Mohammad A. Honarvar, and Farzad Khajeh-Khalili ........ 65

Wideband Tunable High Common-Mode Suppression Filter Based on Varactor-Loaded Slotted Ground  
Hao-Yu Dai and Lin Li ............................................................................ 73

Design and Realization of Circular Polarized SIW Slot Array Antenna for CubeSat Intersatellite Links  
Maha Maged, Fatma Elhefnawi, Haitham Akah, Abdelrahman El-Akhdar, and Hadia El-Hennawy 81

First-Order Minkowski Fractal Circularly Polarized Slot Loop Antenna with Simple Feeding Network for UHF RFID Reader  
Xiuhui Yang, Quanyuan Feng, and Zongliang Zheng ................................. 89
Miniaturized HMSIW Dual-Band Filter Based on CSRRs and Microstrip Open-Stubs
Dan-Dan Lv, Ling-Qin Meng, and Zhe Zou ......................................................... 97

High-Order FDTD with Exponential Time Differencing Algorithm for Modeling Wave Propagation in Debye Dispersive Materials
Wei-Jun Chen and Jun Tang ................................................................. 103

Terahertz Polariton Dispersion in Uniaxial Optical Crystals
Seiji Kojima ................................................................. 109

Printed Frequency Scanning Antenna Array with Wide Scanning Angle Range
Liaori Jidi, Xiangyu Cao, Xuewen Zhu, and Bowen Zhu ......................... 117

A Balanced Bandpass Filter with Ultra-Wide Stopband and Common-mode Suppression
Zhi-Jie Yang, Yang-Yang Shan, Xin-Tong Zou, Feng Wei, and Bin Li ............ 123

Improving the Performance of Profiled Conical Horn Using Polynomial Interpolation and Targeting the Region of Interest
Gupta Jay Vishnu and Dhaval Pujara ......................................................... 129

A Wideband Omnidirectional Printed Array Antenna
Yang Yu, Yong Zhong Zhu, and Wei Guo Dang ........................................... 137
