Chief Editors: Weng Cho Chew and Sailing He

EMW Publishing
Cambridge, Massachusetts, USA
CONTENTS

Interaction of a Sine Wave with an Artificial Negative Permittivity Medium Using Nonstandard FDTD
Jose Jovia, Sikha K. Simon, Joe Kizhakooden, Anju Sebastian, Sreedevi P. Chakyar, Nees Paul Cherala Bindu, Jolly Andrews, and Vallikkavumkal P. Joseph ............................ 1

Broadband Waveguide-Fed 8-by-1 Gap-Coupled Microstrip Antenna Array for 60-GHz Short-Range Point-to-Point Wireless Communications
Chaouki Hannachi, Djerafi Tarek, and Serioja O. Tatu ........................................... 7

Design of an Antenna with Ground Plane Slots for LTE/WWAN Mobile Phones
Peiyu Huang and Linshuo Huang ................................................................. 15

Compact Dual-Band Substrate Integrated Waveguide Crossover with High Isolation
Sholampettai Subramanian Karthikeyan ......................................................... 23

Method to Improve Fault Location Accuracy Against Cables Dispersion Effect
Ousama Osman, Soumaya Sallem, Laurent Sommervogel, Marc Olivas Carrion, Arnaud Peltier Pierre Bonnet and Françoise Paladian ......................................................... 29

A Method of Reducing Air-Gap Harmonic of Permanent Magnet Motor for Fitness Car
Jiancheng Zang, Yan Wang, and Libing Jing .................................................... 37

A Miniaturized TM\textsubscript{21} Mode Circular Microstrip Patch Antenna
Saininad Naik and Maria Pour ................................................................. 45

A Novel Compact Microstrip UWB BPF with Quad Notched Bands Using Quad-Mode Stepped Impedance Resonator
Lihua Wu, Pengli Hu, Changhao Li, Luetao Li, and Chengpei Tang ......................... 51

New TLM Formulation for Modeling Epstein Plasma
Yasser Ekdhiha, Khalid Mounirh, Mohsine Khalladi, and Soufiane El Adraoui ............ 59

Nonlinear Distortion Correction for Single Pixel Conical Scanning Radiometric Imaging System at W-Band
Xuan Lu, Zelong Xiao, and Taiyang Hu ......................................................... 65

A 3D Stokes Framework for Wireless Depolarized Channels
Marcia Golmohamadi and Jeff Frolik .......................................................... 71

A Novel Method of Ship Detection in High-Resolution SAR Images Based on GAN and HMRF Models
Meng Yang and Chenchen Yi ................................................................. 77

Design of Resistive-Loaded Transverse Electromagnetic Horn Antenna for Air-Coupled Ground Penetrating Radar
Youcheng Wang and Xiaojuan Zhang ......................................................... 83
Universal Compensation Method for Trans-Directional Coupled-Line Based Planar Balun with Connecting Segment
Xiao Jia, Shaojun Fang, Hongmei Liu, and Zhongbao Wang ............................................ 91

New Ultra-Wideband Filter with Sharp Notched Band Using Defected Ground Structure
Jingbo Liu, Wenhao Ding, Jianzhong Chen, and Anxue Zhang ........................................ 99

An Improved Calibration Algorithm for the L-Band 1-D Synthetic Aperture Radiometer
Aili Zhang, Hao Liu, and Ji Wu ....................................................................................... 107

Calibration Uncertainty Evaluation of D-Dot Sensors
Fanghong Huang, Youjie Yan, Jin Chen, Zhen Liu, and Binwen Wang .............................. 115

GPR Target Signal Enhancement Using Least Square Fitting Background and Multiple Clustering of Singular Values
Budiman P. A. Rohman and Masahiko Nishimoto ......................................................... 123

Quad-Band Multilayer SIW Filter with High Selectivity and Controllable Bandwidths
Dinghong Jia, Jianqin Deng, Yangping Zhao, and Ke Wu ................................................ 133

A Novel Microstrip Branch-Line Coupler with Wide Suppression Band
Shirui Sha, Yingze Ye, and Zhijie Zhang ................................................................ 139
