## CONTENTS

A Wideband Conformal Antenna with High Pattern Integrity for mmWave 5G Smartphones  
Gulur S. Karthikeya, Mahesh P. Abegaonkar, and Shiban K. Koul ........................................ 1

A Wideband Gate Mixer Using 0.15 $\mu$m GaAs Enhancement-Mode PHEMT Technology  
Xi Wang, Jun Hu, Yongbo Su, Peng Ding, Wuchang Ding, Feng Yang, Asif Muhammad  
and Zhi Jin ................................................................. 7

Runge-Kutta Exponential Time Differencing Scheme for Incorporating Graphene Dispersion in the FDTD Simulations  
Omar Ramadan .............................................................. 15

Compact Wilkinson Power Divider with Higher Order Harmonics Suppression for LTE Application  
Mukesh Kumar, Sk. Nurul Islam, Gobinda Sen, Susanta K. Parui, and Santanu Das ........... 23

Wideband Probe-Fed Rectangular Patch with Defected Ground Structure for Cross Polarization Suppression  
Xuanli Fu, Chunhong Chen, Chengqiang Li, and Wenwei Wang ........................................ 31

Multi-Band Printed Antenna for Portable Wireless Communication Applications  
Nazih Khaddaj Mallat and Amjad Iqbal ........................................ 39

Image Intensity of a Gaussian Rough-Surface in Atmospheric Turbulence  
Ning-Jing Xiang, Xin-Fang Wang, and Dun-Feng Dong ............................................... 47

Investigation of Surface PiN Diodes for a Novel Reconfigurable Antenna  
Han Su, Huixyong Hu, Heming Zhang, and Pedram Mousavi ........................................ 53

A Compact Multiband MIMO Antenna for IEEE 802.11 a/b/g/n Applications  
Wenying Wu, Ruixing Zhi, Yingjian Chen, Han Li, Yanhua Tan, and Gui Liu ...................... 59

Bandwidth Enhanced Circular and Annular Ring Sectoral Patch Antennas  
Uma Balaji ................................................................. 67

Distribution of the Cell Under Test in Sliding Window Detection Processes  
Graham V. Weinberg ..................................................... 75

Spreading Properties of a Lorentz-Gauss Vortex Beam Propagating in Biological Tissues  
Dajun Liu, Hongming Yin, Guiqiu Wang, Aiyi Dong, and Yaochuan Wang ...................... 83

Patch Antenna for Full Duplex Application with Improved Isolation Using Defected Ground Structure  
Carlene Goodbody, Nghi Tran, and Tutku Karacolak ............................................. 91
Four Element MIMO DRA with High Isolation for WLAN Applications
Goffar A. Sarkar, Suparna Ballav, Ayan Chatterje, Subarna Ranjit, and Susanta K. Parui .................................................. 99

Study on Temperature Sensitive Characteristics of UHF Radio Frequency Identification Temperature Sensing Tag
Hongbin Ge, Yuan Yao, and Junsheng Yu ................................................................. 107

Miniaturized HMSIW Bandpass Filter Based on the Coupling of Dual-Iris with Nested Stepped-Impedance CSRRs
Bo Yin, Zhangyao Lin, Honggang Hao, Wei Luo, and Wen Huang ........................................ 115

Synthesis and Design of MMR-Based Ultra-Wideband (UWB) Band Pass Filter (BPF) in Suspended Stripline (SSL) Technology
Mohamad Assaf, Adnan Malki, and Alaa A. Sarhan .................................................... 123

A Double Optimized Transmission Zeros Based on $\pi$-CRLH Dual-Band Bandpass Filter
Ashraf Y. Hassan, and Mahmoud A. Abdalla ......................................................... 131

A Novel Dual-Band Microstrip Bandstop Filter Based on Stepped Impedance Hairpin Resonators
Jangirkhan Dzhumamuhambetov, Abykanova Bakitgul, and Adnan Gorur ..................... 139

An Accurate Explicit Expression for the Self Inductance of Thin-Wire Round Pancake Coils
Luisa Di Paola and Marco Muzi ................................................................. 147
