CONTENTS

Design and Development of Millimeter Wave Interferometer Circuit for Real-Time Measurement of Plasma Density
Praveen K. Atrey, Dhaval Pujara, Subroto Mukherjee, Umesh Nagora, Praveenlal Edappala
Praveena Kumari and Rachana Rajpal ................................................................. 1

Inertial Properties of the TE Waveguide Fields
Fatih Erden, Oleg A. Tretyakov, and Ahmet A. Cosan ........................................... 11

Implementation of Compact LPF Utilizing Defected Structures and Surface Mount Capacitor for Low Insertion Loss and Elliptic Characteristics
Alaa M. Abada, Amr H. Hussein, and Mahmoud A. Attia ........................................ 21

VLF Monitoring System for Characterizing the Lower Region Ionospheric Layer
Nur Ain Zakaria, Afifah Taat, Siti Amalina Enche Abdul Rahim, Wan Zul Adli Wan Mokhtar and Mohamad Huzaimy Bin Jusoh ......................................................... 31

Stacked-patch Dual-Band & Dual-Polarized Antenna with Broadband Baluns for WiMAX & WLAN Applications
Junnan Yu, Yufa Sun, Haoran Zhu, Fan Li, and Yade Fang ....................................... 41

Window Subtracted Wave Band Selection Method for the FTIR/ATR Spectrum Analysis
Jun Xie, Han Zhang, Jianfeng Li, and Fuhong Cai ..................................................... 53

Research on Analysis of Aircraft Echo Characteristics and Classification of Targets in Low-Resolution Radars Based on EEMD
Qiusheng Li, Huaxia Zhang, Qing Lu, and Lehui Wei ............................................... 61

A Compact Dual Band MIMO Antenna with Improved Isolation for WI-MAX and WLAN Applications
Pratima C. Nirmal, Anil Nandgaonkar, Sanjay Nalbalwar, and Rajiv K. Gupta ............ 69

Corrosion Effects on the Magnetic Behavior of Magnetic Circuit of an Induction Machine
M’hamed Ouadah, Omar Touhami, Rachid Ibtiouen, Mohammed Khorchef, and Djilali Allou ... 79

A Current-Mode-Logic-Based Frequency Divider with Ultra-Wideband and Octet Phases
Si-Da Tang, Yu-Sheng Lin, Wei-Hsiang Huang, Chun-Lin Lu, and Yeong-Her Wang ........ 89

A Low Phase-Noise SIW Reflection Oscillator with Hexagonal Resonator
Ziqiang Xu, Li Tan, Yuanxun Li, and Si Huang ......................................................... 99

Semi-Analytical Model for Skewed Magnet Axial Flux Machine
Md Motiur Reza and Rakesh Kumar Srivastava ......................................................... 109

Unconditional Stability Analysis of the 3D-Radial Point Interpolation Method and Crank-Nicolson Scheme
Hichem Naamen and Taoufik Aguili ................................................................. 119
Impact of Medium Randomness on Radar Detection Accuracy with Plane E-Wave Polarization
Hosam El-Ocla ................................................................. 133

A Plasmonic Monopole Antenna Array on Flexible Photovoltaic Panels for Further Use of the Green Energy Harvesting
Yasir Al-Adhami and Ergun Erçelebi ................................................... 143

UWB-SP Standard Transducer Based on Microstrip Line
Jin-Hong Wei, You-Jie Yan, Shou-Long Zhang, Jin Chen, and Zhan-Jun Liu .................. 153

P-OMP-IR Algorithm for Hybrid Precoding in Millimeter Wave MIMO Systems
Ruiyan Du, Fulai Liu, Xinwei Wang, Qingping Zhou, and Xiaoyu Bai ......................... 163

Enhanced Characteristic Basis Function Method for Solving the Monostatic Radar Cross Section of Conducting Targets
Jinyu Zhu, Yufa Sun, and Hongyu Fang ............................................. 173

Average Intensity of Partially Coherent Lorentz Beams in Oceanic Turbulence
Dajun Liu and Yaochuan Wang ....................................................... 181

EMF Exposure Analysis for a Compact Multi-Band 5G Antenna
Kamya Yekeh Yazdandoost and Ilkka Laakso ..................................... 193
