CONTENTS

An Improved Algorithm for Deducing Complex Permittivity of Thin Dielectric Samples with the Transmission/Reflection Method
Minghui Ding, Yanqing Liu, Xinru Lu, Yifeng Li, and Weizhong Tang ................................. 1

A Novel CPW-Fed Planar Monopole Antenna with Broadband Circularly Polarization
Tingting Chen, Jingjing Zhang, and Weijiang Wang .............................................................. 11

Estimating Electric Parameters of Nonhomogeneous Laminar Materials Using Differo-Integral Method
Adam Steckiewicz and Boguslaw Butrylo ........................................................................... 21

Optimum Design of Homopolar Radial Two-Degree-of-Freedom Hybrid Magnetic Bearing
Shengjing Yin, Fengxiao Huang, Yukun Sun, Ye Yuan, Yonghong Huang, and Chi Chen ........... 31

Efficient Sparse Algorithm for Solving Multi-Objects Scattering Based on Compressive Sensing
Doudou Chai and Yiyong Wang ......................................................................................... 43

Piezoelectric Transducer-Tuned Fourth-Order Microstrip Bandpass Filter with Cross-Coupling
Liangzu Cao, Liya Wang, Junmei Yan, and Lixia Yin ............................................................ 53

Very-Low-Profile, Decoupled, Hybrid Two-Antenna System Using Top-Loaded, Coupled Strip Resonator for Notebook Computer Applications
Wei-Hsuan Chang and Saou-Wen Su ................................................................................... 63

Flexible Analytical Curve-Based Dual-Band Antenna for Wireless Body Area Networks
Mohammed M. Bait-Suwailam and Akram Alomainy ............................................................. 73

Laser Systems for Distant Monitoring of Nanopowder Combustion
Lin Li, Petr A. Antipov, Andrei V. Mostovshchikov, Alexander P. Ilyin, and Fedor A. Gubarev . 85

Design and Parametric Analysis of Beveled UWB Triple Band Rejection Antenna
Venkata N. K. Rao Devana and Avula M. Rao ..................................................................... 95

Low RCS Multi-Bit Coding Metasurface Modeling and Optimization: MoM-GEC Method in Conjunction with Genetic Algorithm
Imen Soltani, Takoua Soltani, and Taoufik Aguili ................................................................ 107

Dual Circularly Polarized Substrate Integrated Waveguide Cavity-Backed Antenna with Enhanced Bandwidth and Reduced Size for Wideband Wireless Applications
Tian Li .................................................................................................................................. 117

Miniaturized Suspended-Substrate Two-Conductors Resonator and a Filter on Its Base
Aleksandr A. Leksikov, Alexey M. Serzhantov, Ilya V. Govorun, Aleksey O. Afonin
Andrey V. Uglyumov and Andrey A. Leksikov .................................................................. 127
A Sparse Imaging-Based Clutter Suppression Methodology for One Single Channel SAR
Xin Wang and Teng Li ................................................................. 137

High-Frequency Filters Manufactured Using Hybrid 3D Printing Method
Ubaldo Robles, Edgar Bustamante, Priya Darshni, and Raymond C. Rumpf ............... 147

Modelling the Dielectric Properties of Cow’s Raw Milk under Vat Pasteurization
Suhail N. Abdullah, Kok Y. You, Nor Hisham Khamis, and Cheong Y. Chong ............. 157

Corner Bent Integrated Design of 4G LTE and mmWave 5G Antennas for Mobile Terminals
Muhammad Idrees Magray, Gulur Sadananda Karthikeya, Khalid Muzaffar
and Shiban Kishen Koul .............................................................. 167

Electrically Small Magnetic Probe with PCA for Near-Field Microwave Breast Tumors Detection
Maged A. Aldhaeebi, Thamer S. Almoneef, Hussein Attia, and Omar M. Ramahi .......... 177

Controlling Surface States of Planar Metamaterial Based on Moire Effect
Sergey Yu. Polevoy and Sergey I. Tarapov ......................................... 187

Discontinuous Galerkin VSIE Method for Electromagnetic Scattering from Composite Metallic and Dielectric Structures
Yu-Yu Zhu, Qiang-Ming Cai, Runren Zhang, Xin Cao, Yan-Wen Zhao, Bin Gao, and Jun Fan . 197
