## CONTENTS

Wanlu Li, Quandi Wang, Jianwei Kang, and Yingcong Wang ................................. 1

An Investigation of Dual-Band Dual-Square Ring (DSR) Based Microstrip Antenna for WiFi/WLAN and 5G-NR Wireless Applications  
Biswa Ranjan Swain and Ashish Kumar Sharma .................................................. 17

Analysis of Multiplication Characteristics of Coaxial Waveguide Loaded Ceramic under External Electric Field  
Long Yao, Rui Zhang, Yong Wang, and Xue Zhang ............................................... 27

DOA Estimation for Non-Circular Signal with Nested Array  
Jing Zhao, Sheng Liu, Sihuan Que, Qikui Zou, and Mengmei Ou ............................ 39

Ship Target Tracking Using Underwater Electric Field  
Peng Yu, Jinfang Cheng, and Jiawei Zhang ......................................................... 49

Thermal Characteristics Analysis of Single-Winding Bearingless Switched Reluctance Motor  
Yonghong Huang, Fengxiao Huang, Ying Zhang, Chi Chen, Ye Yuan, and Jianhua Luo .... 59

Ambiguity in the Definition of Effective Dielectric Permittivity of Layered Heterogeneous Medium  
Vladimir M. Serdyuk and Joseph A. Titovitsky .................................................... 71

Study of the Frequency Characteristic for a Magnetically Coupled Resonant Wireless Power Transmission System with Changes of the Capacitance  
Zhongqi Li, Yang Yuan, Shoudao Huang, Yonghong Long, Kaiyuan Lu, and Jiliang Yi .... 79

A Method for Fast Establishing Tropospheric Refractivity Profile Model Based on Radial Basis Function Neural Network  
Tao Ma, Heng Liu, and Yu Zhang ................................................................. 93

Optimization of Quasi-Constant Mutual Inductance of Asymmetrical Coils with Lateral Misalignment in Wireless Power Transfer System  
Zhongqi Li, Jing Li, Jiliang Yi, Wuxian Liao, and Min Zhang ............................... 103

The Effect of Number of Pole Pairs on Torque Ripple of Magnetic Gear  
Libing Jing and Zhangxian Huang ................................................................. 115

Efficient High-Speed Strip-Mode SAR Raw Signal Simulator of Extended Scene Included Static and Moving Targets  
Liang Yang ................................................................. 125
Polycarbonate Based Overlapped Architecture for Landscape and Portrait Modes of mmWave 5G Smartphone
Gulur S. Karthikeya, Mahesh P. Abegaonkar, and Shiban K. Koul .......................... 135

A Co-Polarized Microwave Absorber with Dual Mode Resonance Based on Dual Split Ring Geometry for Wi-Max and WLAN Applications
Gobinda Sen, Anumoy Ghosh, Mukesh Kumar, Sk. Nurul Islam, and Santanu Das ............ 145

A Two-Step Method for the Low-Sidelobe Synthesis of Uniform Amplitude Planar Sparse Arrays
Lanmei Wang, Xin-Kuan Wang, Gui-Bao Wang, and Jian-Ke Jia ............................... 153

Compact, Broadband and Reliable Lateral MEMS Switching Networks for 5G Communications
Sukomal Dey, Shiban K. Koul, Ajay K. Poddar, and Ulrich Rohde ............................. 163

Deminiaturized Mode Control Rectangular Dielectric Resonator Antenna
Richa Gupta and Arti Vaish ................................................................. 173

Study of Transmitter Interference to Receiver at 2 GHz with High Antenna Port Isolation
Marko Sonkki, Janne Aikio, Marko E. Leinonen, and Aarno Pärssinen ......................... 183

Dual-Mode Dual-Band Bandpass Filter with Asymmetrical Transmission Zeros
Natchayathorn Wattikornsirikul and Montree Kumngern ........................................ 193

Computer-Aided Design of Superconducting Equilateral Triangular Patch on Anisotropic Substrates
Abdelkarim Gadda, Sami Bedra, Chahinez Agaba, Siham Benkouda, Randa Bedra and Tarek Fortaki .......................................................... 203
